

**Pioneering Global WorkSpaces Deployment
for a Leading Financial Software Company**

About the company

Established in the early 1980s, this company is a leading provider of financial management solutions for small businesses, consumers, and accounting professionals globally. It specialises in software for personal finance, accounting, and tax preparation, helping millions of customers manage their financial data more effectively.

With a robust suite of products, the company empowers users to take control of their financial lives, whether they are managing personal budgets, running a small business, or navigating complex tax regulations. Its innovative approach combines powerful technology with user-friendly interfaces, facilitating seamless management of financial tasks.

The company is deeply committed to solving pressing financial challenges and continuously evolves its technology to meet the changing needs of its users. By fostering a culture of customer-centric innovation, it remains at the forefront of the industry, helping to shape the future of financial management and compliance.

Case Study

BACKGROUND

A leading financial software company faced an ambitious challenge, to globally deploy WorkSpaces for up to 120,000 end users. This initiative was critical for facilitating worldwide training sessions on their flagship accounting software, aiming to enhance global accessibility and the effectiveness of their training offerings.

CHALLENGE

The scale and security requirements of this task were considered nearly insurmountable by many. The project necessitated the creation of a secure, reliable, and massively scalable cloud-based infrastructure. This infrastructure was required not just for deployment but also for the management of an unprecedented number of WorkSpaces across the globe, with a paramount concern for maintaining the highest security standards to protect sensitive financial data.

WHY NUVENS?

We specialise in Amazon WorkSpaces and AppStream 2.0 as a trusted AWS Advanced Partner, assisting clients in all AWS regions with the migration of their desktops and applications to the AWS Platform. Using Amazon WorkSpaces Manager, you can automate, deploy, and manage your remote workforce from anywhere in the world.

SOLUTION

Undeterred by the daunting nature of this task, Nuvens engineered a ground-breaking solution. They developed a zero-trust infrastructure platform, enabling the secure, scalable management of WorkSpaces deployment. This solution showcased Nuvens' commitment to leveraging cutting-edge technology, including integration with Slack for streamlined WorkSpaces management and resolution of issues. Moreover, Nuvens achieved integration with Windows 11 and Intune, demonstrating not only their technical prowess but also their capacity to push the boundaries of what was technically conceivable.

Case Study

FROM THE CUSTOMER

I wanted to take a moment to express my appreciation for Paul Brown's outstanding partnership as a representative of Nuvens. His dedication and expertise as a technical subject matter expert has been invaluable to our collaboration and Cloud PC (WorkSpaces) journey. His unwavering commitment to assisting us and supporting our requirements has not gone unnoticed. He consistently goes above and beyond to deliver on our asks and requirements, ensuring our needs are met precisely and excellently.

Our engineer's feedback working with him has been an absolute pleasure. His responsiveness, knowledge, and willingness to assist have made our deployment much more successful. His contribution as a partner cannot be overstated, and we genuinely could not ask for a better collaborator.

Thank you for the unwavering support. We truly value the partnership and look forward to continuing our successful collaboration in the future.

End User Compute Team

INNOVATION

Zero-Trust Infrastructure

Established unparalleled security across the global WorkSpaces deployment.

Slack Integration

Facilitated quick troubleshooting and efficient WorkSpaces management, setting a new standard for operational efficiency.

Windows 11 and InTune Integration

Achieved a significant technological milestone, surmounting challenges previously thought to limit industry capabilities.

RESULTS

The partnership between Nuvens and the financial software company stands as a testament to the transformative power of software innovation. What was once deemed impossible was turned into a scalable, secure, and highly efficient operational reality. The company now operates a global training system with unmatched availability and security, significantly surpassing initial expectations.

This collaboration not only marks a significant milestone in global WorkSpaces deployment but also sets the stage for future technological advances. The financial software company and Nuvens look forward to continuing their ground-breaking work, leveraging their established infrastructure to further explore the frontiers of software innovation in WorkSpaces management.
